

## BENTLEY

### BENTLEY SKYLINE

The skyline, which defines the developmental contours of a city, is the paean of imagination and technology. New York, Paris, Dubai..., the world's cosmopolitan cities all embrace their distinguishing skylines. With Swiss origin and German craftsmanship, the watch brand BENTLEY launches its SKYLINE watch series, jetting up to the azure to record the dazzling moments of life.

BENTLEY's new SKYLINE watch series adopts stainless steel case and 42mm diameter. With ring-in-ring dial design, the hour, minute and second index display independently in three-dimensional layers. Date window sets at 6 o'clock while small second dial sets at 3 o'clock direction. The chronograph function is activated by a 2 o'clock jumper and is read by central second-timing hands and 9 o'clock minute-timing dial. The dial is beautified in modern embellishment, with central inner ring and grilled-texture binocular window, contrasting to hairline outer ring and minute ring in smooth surface. SKYLINE series establishes contemporary fashion icon, perfectly designed for cosmopolitan professionals to mark their glorious imprint in the world.
