

BENTLEY

BL1831-Power Move Timepiece

A Restless Heart Submerged Beneath the Graceful Appearance

Life is a race trail with no speed limit and I am the free style driver steering the wheel. BENTLEY Power Move Timepiece is the comrade I have when I steer into the adventure. Partially skeleton watch dial resembles the racing car dashboard, the beats in the mechanical movement all stimulate me to advance without fear. Filled with vigor and confidence in each moment, I am in full power mode and ready for any upcoming challenges.

As a racing car bred in technology and streamline design, BENTLEY Power Move Timepiece comes with dashing elegance exterior but interior is an agitated movement. Impeccable taste and harmonious streamline are disclosed in every detail. Solid time indexes are polished in 5 facets of cutting and glowing in daring radiance in lighting reflection. 24 hours window is located at 6 o'clock to tell the time in AM and PM, and the partial skeleton window is located at 9 o'clock to be the most eye-catching part that displays the caliber movement. Trident supporting frames is designed to be associated with the steer wheel of the race car. Classic logo B stresses again the legacy passing from German race car manufacture technics. Skeleton craftsmanship is used for hour and minute hand to correspond with the skeleton window.

BENTLEY Power Move Timepiece launches two different functions with central hand version BL1831-15, and another with power reserve version BL1831-25. Watch case comes in stainless steel and golden stainless steel, and the dial is in silver, black, blue and brown colors for options. Moreover, even the strap comes with bracelet strap and leather strap. Transparent base provides utter openness to the movement details and the extraordinary golden oscillation.
