

BENTLEY

BL1850- Jazz Heartbeat Timepiece

Intricate Mechanism Flows the Craftsmanship in Vintage and Timeless Rhyme

Just as a synchronized Jazz band with independent instruments and disparate notes but somehow all work in harmony and play a tune of perfection enchantingly, the soul of a mechanic timepiece flows from the complicated and calculated mechanism. BENTLEY Jazz Heartbeat Timepiece collection adopts a joyous design on the dial with sight of the oscillation rotor and vintage style flattering a elegance touch for the elaborate and intricate craftsmanship.

Round watch dial, thin brim on the bezel and convex dial surface are three traits to maximize the métiers on the dial. The “Happy Window” situated at 9 o’clock is the focal point for wearer to appreciate the movement beat with backdrops of the sharpened triangular shape indexes at 3, 6, 9 and 12 o’clock and the baton shape time indexes of the rest. Skeleton window is installed with a second time zone in 24 hours format for business travelers to grasp the two time zones efficiently. Crystalline base reveals components and movement, breaths and soul of the caliber. Golden oscillating rotor adds the royal and grandeur touch with vintage style of seven plates of strap in golden stainless steel and dual colors of white gold and golden color stainless steel. Black, white, burgundy red, champagne gold and the popular blue are colors for selection for the dial to fit for various occasion or style.
