

BENTLEY

BENTLEY AQUA MARINE dive watch series

The adventure paragon of marine spirit

The inexhaustible ocean is the trial field for adventurous spirit and wristwatch function. The moisture and salinity of the sea, in addition to its wave fluctuating between placidity and wildness, transform the dive watch into the intrepid emblem of adventurous spirit.

Since men's watch was invented at 1904, it has always been the supreme companion for sea heroes. At that time when aircraft transportation wasn't universalized, the world was connected by seaways. Reclamation of marine territory was considered the milestone of adventurous spirit. Watchmakers devoted themselves into developing a fully-waterproof, accurately-timekeeping watch. The watertight, salinity-repellent and pressure-endurable dive watch is undoubtedly the epoch-making technology quintessence.

BENTLEY AQUA MARINE dive watch series, founded on marine spirit and adventure paragon, is the yearly flagship production with intact function of central second and date, 24-hour display, chronograph...etc. Integrated stainless steel case and lugs collocate with a variety of colors: steel silver, PVD black, gold. Unidirectional rotated bezel is displayed in 5-minute-interval. Valiant case in classical black, white, midnight blue and army green, with luminous geometric hour index and sword-pattern Barton hands, provides the finest time-reading effect under the murky sea. Elegant B-logos ornamented on small second and 12 o'clock position reveal the brand's classical lineage from Switzerland's watch town La Chaux-de-Fonds. Tachymeter is equipped in the inner surface, measuring an object's 1km speed. Press the 2 o'clock button to start timing, and press again to stop. Once pushing down the 4 o'clock reset button, second hand would immediately return to zero: splendid visual effect! Bracelet choice diversifies from classical stainless steel to calf leather and nylon strap.

- Classical dive watch design: luminous hour index and sword-pattern Barton hand
- Unidirectional rotated bezel displayed in 5-minute-interval.
Tachymeter equipped in inner surface.
- Flagship production with intact function of central second and date, 24-hour display, chronograph.
