## BENTLEY ULTRA RACING

Acquiring an intricate complication watch and a dashing racing car would be the ultimate goal to pursue in life for most of men. BENTLEY ULTRA RACING is the perfect embodiment combining both that realizes the impossible to become the possible.

In a ferocious sports car race where each second is critical, BENTLEY ULTRA RACING is veracious and accurate to snatch every moment. The watch dial is in classic three sub-dials array where small seconds dial is indicated at 9 o'clock, elapsed minute dial is positioned at 6 o'clock and 24 hour dial is located at 3 o'clock, which has the identical arrangement with the dashboard of a formal racing car. Hour and minute hands are meticulously designed in sword shape while a capital B symbolizes BENTLEY is erected at the end of the center elapsed second hand and on the rim of dial is displayed the tachymeter for recording velocity in kilometers per hour. BENTLEY ULTRA RACING considers not only the practicability by arranging function dials in conformity with the sports race car but also takes the aesthetics into account with exquisite design details.

Versatile dial designs, including the grate pattern on the dial inspired by the air intake in front of a race car and the dial paved with mother of pearl, and copious of straps styles are BENTLEY ULTRA RACING's few features. Creative dial designs shimmer with diamond indexes as well as the white sapphires studded on the bezel, case and the strap making this masterpiece armored in radiance and the sublimity, and even more irresistible than a real race car rivaling for the admiration.
