

BENTLEY

BL1870-SMART TOURBILLON

The spirit of innovation and fine watchmaking is the brand's DNA deeply imprinted in the core of BENTLEY watch, which originated from La Chaux-de-Fonds, Switzerland since 1948. We keep innovating, constantly challenge ourselves, inject the latest production technology and design perspectives into our products, and still preserve the fine watchmaking traditions, creating exquisite details and outstanding styles. After 3 years of research and development, we proudly present the whole new SMART TOURBILLON series, the inventive masterpiece perfectly shows our brand's DNA.

BENTLEY SMART TOURBILLON series is equipped with a whole new smart tourbillon hybrid movement, which has been developed in 3 years. With ultra-low power consumption design, it has 5 years operating time on rechargeable battery, accuracy ± 1 second per day. The main feature of the movement is the integration of a tourbillon with Bluetooth® multi-function. It provides not only the joy of appreciating the exquisite operation of a tourbillon, but also the convenience of a smart watch.

What is tourbillon? It is an accuracy improvement addition invented in 1795. In the 19th century, pocket watches were placed vertically in clothing pockets. Due to maintaining a specific orientation for a long time, the movement was affected by gravity and existed huge inaccuracies. It offset the deviation caused by gravity and improve the accuracy greatly. Today, tourbillon has become a symbol of fine watchmaking, which is highly collectible and only appears in hi-end watches.

The movement of BENTLEY SMART TOURBILLON series adopts a tourbillon with 36 hours power reservation and hand winding system, which preserves the joy of wearing a mechanical watch. The tourbillon can also indicate seconds by 1 rotation in 60 seconds. It's configuration is similar like a traditional small second watch, and surprisingly combine several smart functions, presents a perfect balance between innovation

and fine watchmaking.

BENTLEY SMART TOURBILLON series is equipped with hour/minute hands system. By using the function setting button at 2 o'clock and start/stop button at 4 o'clock, the dial displays time/day/date/month/annual calendar. It also provides step counting/ sleep monitoring/temperature/automatic time adjustment with exclusive mobile app via Bluetooth®. It is truly a new generation multifunctional watch with the value of craftsmanship and everyday health functions.

BENTLEY SMART TOURBILLON series has launched 2 new models “King Harald” and “Royal Gormsson”, which inspired by the Harald "Bluetooth" Gormsson

, a legendary king of Denmark and Norway. His nickname "Bluetooth" is exactly the inspiration of the Bluetooth® technology. “King Harald” adopts stainless steel round case with black PVD coating, baton hands. Inner circle numeral index, outer circle baton index/minute index are well arranged on the dial. The 1-31 date ring and percentage scale ring are located at the outermost circle, which indicate the date, percentage of battery power, and step counting progress. The small squares in the 12-3 o'clock direction are the indications of the calendar, weekly and monthly calendar functions. The moon symbol in the 3-4 o'clock direction shows the low-energy sleeping mode, the gear symbol in the 4-5 o'clock direction shows the time adjustment mode, the 5-6 o'clock direction is the Bluetooth connection mode, and the tourbillon is located at 7-8 o'clock. The center of the dial is decorated with a ring shape. Brand name, B logo and the name of the watch is at 12 o'clock. The overall design brings a modern and youthful vigor.

“Royal Gormsson” adopts stainless steel round case with bright finishing. Baton hands and index are well arranged on the dial. The 1-31 date ring is in the inner circle, the percentage scale ring is in the outer circle, which indicates the date, percentage of battery power, and step counting progress. The calendar function dots, The moon symbol sleeping mode, the time adjustment function circle, and the Bluetooth® are well arranged in the central dial, and the tourbillon is located at 7-8 o'clock. The overall design is clean and youthful.

The series features a see-through case back, decorated with beautiful B-shaped logo, and sun burst finishing, which gives an exquisite touch. BENTLEY SMART TOURBILLON series, combining wisdom and chic, is an innovative masterpiece that that you must own.
